Dear Reader:

Attached is an unclassified Falcon Associates study "Why the Soviets Violate Arms Control Treaties."

When you review or read this document, there are several useful points to keep in mind:

- o This is the first of two contractor works done in the context of competitive analysis.
- o The second report will be available to you in the near future.
- o The purpose of these studies is simply and solely to get independent views on the issue of Soviet motivations for violating treaties.
- o The views expressed in this report are exclusively those of the author.
- o The author may publish this material in other unclassified forms.
